Contents of volume 16

January 1981

Editorial: Into the new decade: ERIC DEESON *1*
January leader: Widening one's horizons: J A CHAMPION *1*
The challenge of acoustics: P LORD *11*
A profile of the National Physical Laboratory: ANDREW WALLARD *15*
Holography in measurement: E H MCLACHLAN *22*
A ripple tank explanation of holography: MOSHE WEISS *25*
Physics on stamps: Appendix XI: E J BURGE *30*
Communication networks, soap films and vectors: R C CLARK *32*
Lissajous' figures B A SMITH *38*
Extension–load curves for materials under tension: D A RICHARDS *44*
A computer-managed Keller plan: J H EMCK and M G M FERGUSON-HESSLER *46*
Notes on experiments *50*
A simple apparatus for electrostatic force measurement D P HALE *58*
News and comment *2*, Letters *4*, Have you read this? *49*, Queries in physics *57*, Film reviews *60*, Book reviews *61*, Forthcoming conferences and courses *64*
Teaching control of variables to primary school teachers: YEHUDA SHADMI *93*
Soldering and surface tension: J A CHAMPION *98*
Notes on experiments *101*
Low temperature thermometry using inexpensive silicon diodes: N R WALTHAM, G F CLARK and B K TANNER *104*
Playing the quantum shuffling game with programmable pocket calculators and microcomputers: G SAUER *108*
Criticisms of the projectile theory of light: G N CANTOR *112*
News and comment *65*, Letters, Have you read this? *68*, Physics apparatus *86*, Physics in the media *98*, Queries in physics *111*, Film reviews *119*, Book reviews *120*, Forthcoming conferences and courses *124*

April 1981

Physics courses supplement
Introduction *1*
Courses in physics in England, Wales and Northern Ireland *3*
Courses in physics in Scotland *53*

March 1981

March leader: The language of physics: R W WHITWORTH *65*
What's the use of a textbook? C F MANN *70*
Language and physics: PETER LOGAN *74*
Rapid statistical methods: part 2b—the straight line: A J LYON *77*
Coupled oscillations: D A RICHARDS *83*
Quantum physics for beginners: J STRNAD *88*

May 1981

May leader: Falling rolls—or falling roles? JOHN BAUSOR *125*
A national core syllabus for A-level physics: C J ADKINS *128*
Microprocessors in schools? L G CUTHBERT *136*
Electronics—the new core technology: PAUL STEVENSON *141*
Microcomputers in physics: BOB SPARKES *145*

Some simulations of science—part 1: GEORGE MARX *152*
16+ examination for Nuffield physics: JOHN L LEWIS *157*
Quartz resonators: J C BRICE *162*
A thematic approach to the teaching of physics: R G PONTIN and I THOMSON *167*
TEC physics assessment: J S HALLIDAY *172*
Matter for illumination JOAN L HAWES *178*
News and comment *126*, Physics Loadgo *144*, Queries in physics *156*, Have you read this? *160*, Physics in the media *177*, Book reviews *185*, Forthcoming conferences and courses *192*

July 1981

July leader: Physics for none to 16? W F ARCHENHOLD *193*
Editorial: ERIC DEESON *198*
A teacher's view: JOAN SOLOMON *199*
A university view: R G CHAMBERS *201*
Views of a teacher training course tutor: M J TEBBUTT *202*
The PIP view: CHARLES TAYLOR *204*
The CEI view: H W FRENCH *206*
A headmaster's view: COLIN CROFTS *208*
A lecturer's view: JOHN WARREN *210*
Some simulations of science—part 2: GEORGE MARX *212*
Soap films and bubbles: C ISENBERG *218*
Physics teaching at the University of Petroleum and Minerals: M A IJAZ and M N KHAN *223*
Teachers' views about the Nuffield advanced physics course: M J TEBBUTT *228*
Physical limitations in lithography for microelectronics: P G FLAVIN *234*
The Unilab Blue Chip range for introducing microelectronics: W H JARVIS *239*
Underwater acoustics: D J CREASEY *244*
News and comment *194*, Letters *196*, Have you read this? *197*, Queries in physics *250*, Film reviews *250*, Book review article *251*, Book reviews *252*, Forthcoming conferences and courses *256*

September 1981

Editorial: Girls and science: ERIC DEESON *257*
Tracking down sexism in physics textbooks: GEOFFREY WALFORD *261*
Women in technology—a role for the Open University? AILSA SWARBRICK *266*
Archimedes' law as a problem in statics: YEHUDA SHADMI *270*
The nuclear debate—examination of the issues: H I ELLINGTON and E ADDINALL *274*
The nuclear debate: ERIC DEESON *282*
The case for nuclear power: J H FREMLIN *282*
Possible health hazards of nuclear power: G KNEALE *284*
Teachers' reactions to the JMB A-level physics core: M J TEBBUTT *287*
A physics with microcomputing degree course: DAVID L HURD *291*
The Sinclair ZX81—toy or treasure? ERIC DEESON *294*
A single system of examining at 16+: M J PIPES *296*
The physics of music: S R HOON and B K TANNER *300*
Notes on experiments *311*
News and comment *257*, Letters *259*, Queries in physics *273*, Have you read this? *315*, Resources reviews *316*, Book reviews *317*, Forthcoming conferences and courses *320*

November 1981

November leader: Search for self-respect: MARTIN BROWN *321*
Molecular beam epitaxy: B A JOYCE *328*
Concentrated parallel beams of light: J M HERBERT *332*
Polarised light and the measurement of birefringence: D A RICHARDS *336*
Digital voltage measurements using a microprocessor: P A ATKINSON and C C HORLEY *340*
Mastermind and scientific method: SOREN TORNKVIST *344*
Communication studies and the extended power station game: STEWART MARSHALL *347*
The use of satellites by schools and colleges—part 1: D A DUFF *352*
An approach to conceptual difficulties in physics: HUGH G JONES and ROBERT J MOONEY *356*
A survey of some children's ideas about force: D M WATTS and A ZYLBERSZTAJN *360*
Apparent wavelength of a source to a moving observer: W GOUGH and J P G RICHARDS *366*
Teachers' reactions to the JMB A-level physics options: M J TEBBUTT *369*
Soap film analogue of Fermat's principle and Snell's law: DAVID LOVETT *376*
The χ^2 test and goodness of data: N NATH and S N CHATURVEDI *380*
News and comment *322*, Letters *323*, Have you read this? *326*, Physics Loadgo *346*, Queries in physics *368*, Book reviews *382*, Forthcoming conferences and courses *384*

Index to volume 16

Subjects

(*L*) denotes letter to the Editor,
(*R*) conference or exhibition report

Accelerometer, Centripetal *50*
Acoustics, The challenge of *11*
Acoustics, Underwater *244*
Alpha particle detection by plastic film *102*
Ampere, Definition of the *323(L)*
Archimedes' law as a problem in statics *270*
Astronomy and physics *127(R)*

Broadcasts, School physics *127*

Chadwick, Sir James *68*
Chi-squared test and goodness of data, The *380*
Conceptual difficulties in physics, An approach to *356*
'Control of variables' to primary school teachers, Teaching *93*
Core syllabus for A-level physics, A national *128, 198–211, 323(L)*

Decisions in the Science Department *194*

Electronics—the new core technology *141*
Electrostatic force measurement, A simple apparatus for *58*
Extension–load curves for materials under tension *44*

Falling rolls—or falling roles? *125*
Force, A survey of some children's ideas about *360*

Geology, Careers in *1*
Girls and science *257*
Girls in science *3*

Hexadecimal counting? Use your fingers! *55*
Holographic interferometry, for in-plane translation, Single-beam *314*
Holography, A ripple tank explanation of *25, 260(L)*
Holography in measurement *22*

Industry's influence on education *323*
Institute of Physics, Teachers and The *126*

JMB A-level physics core, Teachers' reactions to the *287*
JMB A-level physics options, Teachers' reactions to the *369*

Keller plan, A computer-managed *46*

Language and physics *74*
Language of physics, The *65*
Light and the measurement of birefringence, Polarised *336*
Light, Concentrated parallel beams of *332*
Lissajous' figures *38, 325(L)*

Macfarlane report *126*
Magnetic fields, Depiction of *101*
Manchester, Open day at *322(R)*
Mastermind and scientific method *344*
Metallurgy, Careers in *1*
Microcomputers in physics *145*
Microcomputers in school physics, The use of *257(R)*
Microcomputing degree course, A physics with *291*
Microelectronics, Physical limitations in lithography *234*
Microprocessor, Digital voltage measurements using a *340*
Microprocessor: What do physicists need to know? *65(R)*
Microprocessors and Product Design *259*
Microprocessors in schools? *136*
Mole, The *259(L)*
Molecular beam epitaxy *328*
Mpemba effect *7(L)*
Multiple-choice tests *7(L), 196(L)*
Music, The physics of *300*

National Physical Laboratory, A profile of *15*
Nuclear debate—examination of the issues, The *274*
Nuclear physics and nuclear power *3*
Nuclear power, Possible health hazards of *284*
Nuclear power, The case for *282*
Nuffield advanced physics course, Teachers' views about the *228*

Operational amplifiers—some misconceptions *4(L)*
Oscillations and resonance in tuned circuits, Display of *55*
Oscillations, Coupled *83*

Physics Education 1982 *322*
Physics for none to 16? *192*

Physics Loadgo No. 1 *67*
Power station game, Communication studies and the extended *347*
Projectile theory of light, Criticisms of *112*

Quantum physics for beginners *88*
Quantum shuffling game with programmable pocket calculators and microcomputers, Playing the *108*
Quantum theory, Beginnings of *178*
Quartz resonators *162*

Research in schools *67*

Safety, School *127*
Satellite teaching pack *3*
Satellites by schools and colleges, The use of *352*
Search for self-respect *321*
Sexism in physics textbooks, Tracking down *261*
Shortage of physics teachers *194*
Simulations of science *152, 212*
Sinclair ZX81—toy or treasure, The *294*
Sixteen-plus, A single system of examining at *296*
Sixteen-plus examination for Nuffield physics *157*
Soap film analogue of Fermat's principle and Snell's law *376*
Soap films and bubbles *218*
Soap films and vectors, Communication networks *32*
Soldering and surface tension *98, 324(L)*
Stamps, Physics on: Appendix XI *30*
Standards, Checking on *259*
Statistical methods, Rapid *77*
Statistics of physics education *67*
Supply and training of physics teachers *258*

Tape times, Universal curve for *101, 311*
TEC physics assessment *172, 196(L)*
Technology, Pupils' attitudes to *2*
Textbook, What's the use of a *70*
Thematic approach to the teaching of physics, A *167*
Thermometry using inexpensive silicon diodes, Low temperature *104*
Thévenin's theorem, A simple example of the use of *312*
Trotter, A W *194*
Tyndall lecture series *195(R)*

Unilab Blue Chip range for introducing microelectronics, The *239*
University of Petroleum and Minerals, Physics teaching at the *223*

Wavelength of a source to a moving observer, Apparent *366*
Weightlessness *52*
Women in technology—a role for the Open University *266*

Authors with titles

(*L*) denotes letters to the Editor,
(*R*) conference of exhibition report

Addinall E: see Ellington H I
Adkins C J: A national core syllabus for A-level physics *128*
Archenhold W F: Physics for none to 16? *193*
Archenhold W F: see Gough C
Atkinson P A and Horley C C: Digital voltage measurements using a microprocessor *340*

Bausor J: Falling rolls—or falling roles? *125*
Beeston J A: Display of oscillations and resonance in tuned circuits *55*
Bergamasco G and Zini G: A simple example of the use of Thévenin's theorem *312*
Brice J C: Quartz resonators *162*
Briggs A G and Briggs M S J: Depiction of magnetic fields *101*
Brown M: Search for self-respect *321*
Burge E J: Physics on stamps: Appendix XI *30*

Cantor G N: Criticisms of the projectile theory of light *112*
Chambers R G: A university view *201*
Champion J A: Soldering and surface tension *98, 324(L)*
Champion J A: Widening one's horizons *1*
Chaturvedi S N: see Nath N
Clark G F: see Waltham N R
Clark R C: Communication networks, soap films and vectors *32*
Clayton D G: The mole *259(L)*
Creasey D J: Underwater acoustics *244*
Crofts C: A headmaster's view *208*
Cuthbert L G: Microprocessors in schools? *136*

Deeson E: ASE manufacturers' exhibition *86(R)*
Deeson E: Decisions, decisions . . . *194*
Deeson E: Girls and science *257*
Deeson E: Industry's influence on education *323*
Deeson E: Into the new decade *1*
Deeson E: Micro-OU *259*
Deeson E: *Physics Loadgo* no. 1 *67*
Deeson E: 16–19s under the microscope *126*
Deeson E: Supply and training of science teachers *258*
Deeson E: The nuclear debate *282*
Deeson E: The Sinclair ZX81—toy or treasure? *294*
Deeson E: Views on the core syllabus for A-level physics *198*
Duff D A: The use of satellites by schools and colleges—part 1 *352*

Ellington H I and Addinall E: The nuclear debate—examination of the issues *274*
